

BIO HORETICS TM

ADVANCED TOOLS FOR EXPLORATION

New...

Three new IPG strips from **SERVATM Electrophoresis**

- ⇒ **11cm**
- ⇒ **17cm**
- ⇒ **pH gradient 5-8**

With these three new strips, SERVA Electrophoresis now offers the broadest range of IPG strips available for the proteomic research.

Available in:

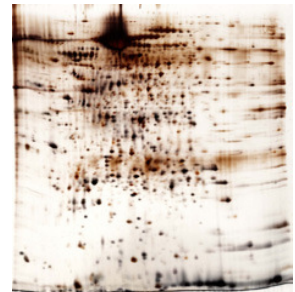

- Strip lengths: 7, 11, 17, 18 and 24 cm
- pH gradients: 3 - 10, 3 -10 NL, 3 - 6, 4 - 7, 5 - 8, 6 - 10
- GMP/GLP conformity – each strip has individual lot number

With 30 different IPG strips to choose from, you can maximize the productivity and discovery potential of your protein mining project, all from one source; SERVA. For optimum performance in your 2D gel electrophoresis experiments, SERVA recommends addition of SERVALYTTM carrier ampholytes to the rehydration buffer.

Servalyt Ampholytes

- ⇒ **German Quality**
- ⇒ **Superior Resolution**
- ⇒ **Excellent Reproducibility**
- ⇒ **Outstanding Performance**
